

GIA CLASSIFIED

Date: March 7th 2776
From: GIA Head of Experimental Technologies Division
George Varga
To GIA Director [REDACTED]

Psychological Evaluation

Dr. Joseph Docker

Dr. Joseph Docker is the highly intelligent genius scientist spearheading our advancement in AI technology. But because of this, and because of his genius, he has formed some kind of God complex in a way where he believes himself to be above everything, and everybody else along with this in our conversations, he expresses certain desires, and certain things that show a more sadistic side to him that also shows his sociopathic tendencies. Despite this, he is cleared for everything he needs for this project in my personal opinion if he is using his own brain as a blueprint for this artificial intelligence, would that mean that these tendencies are passed down to it?
