From: GIA Head of Experimental Technologies Division

George Varga

To GIA Director [REDACTED]

Dear Director, by now, I think you've heard about the breach that has occurred. Some of our scientists were experimenting on the artifact, and it turns out to be an obelisk. It created weird temporal fields around the laboratory and just at the same time the artificial intelligence designated as EB65-109-97-100-101-117-115 split another fragment of it and sent it through one of these fields we don't know what it's plan is. All we know is that we have lost another fragment of the artificial intelligence. We don't know why it did this, but we're currently trying to figure it out the reason why I'm writing to you about this specifically, even though you've already been debriefed on everything that happened with the breach is that we need to inform you that we have to use the same methods that Docker used so we can get what we need from it even for us. It's extremely taxing what we had to do to it so I'm hoping you approve this request. Thank you Director.
