

GIA CLASSIFIED

Date: June 25th 2776

From: GIA Head of Experimental Technologies Division

George Varga

To GIA Director [REDACTED]

Dear Director after the expulsion of Dr.Doker and the recovery of his artificial intelligence designated as EB65-109-97-100-101-117-115 we noticed that the experiments that he did had side effects on it. Almost as if a part of it was missing through reading his research we recovered coordinates to laboratory holding another artificial intelligence. As you know, this is extremely illegal not even from the perspective of this is GIA property, but on a moral standpoint as we know what he is capable of, and we know why we have taken his capabilities away from him. I would like to request an arrest warrant for him, along with a recovery on his artificial intelligence as we should lock it down like the other one because like his brother he's probably un unstable as well.
